OBJECTIVE

Data Analyst with 2.2+ years of freelance experience delivering insights for clients in e-commerce, pharma, and services. Skilled in SQL, Python, BigQuery, Tableau, Power BI, and Looker Studio. Expert in ETL, data cleaning, and visual reporting. Passionate about solving problems through data-driven decision-making.

SKILLS

Technical Skills	Python, SQL, ETL, Data Visualization, Predictive Modeling, Machine Learning
Soft Skills	Problem Solving, Analytical Thinking, Communication, Time Management.
Other skills	Google BigQuery, GCP, Data Pipelines, Feature Engineering, Excel, Teamwork.

EXPERIENCE

Freelance Data Analyst Global Clients	Remote — Feb 2022 – Apr 2024
---	------------------------------

- Delivered analytics solutions for e-commerce, pharma, and service-based clients.
- Built automated dashboards to track KPIs using Tableau and Power BI.
- Developed SQL and Python pipelines for trend and pricing analysis.
- Standardized insight delivery by creating SOPs and structured reports.

Research Analyst Humanity Pathways Global	Remote — Apr 2025 – Present Michigan, USA
---	--

- Conducted donor and client trend analysis using online databases and browsers.
- Created Looker Studio dashboards and trackers for internal reporting.
- Authored SOPs and visual reports for stakeholder presentations.
- Enhanced outreach strategies through insight-driven research.

Data Analyst Intern Sarvagya Institute	OnSite — Jul 2024 – Sep 2024 New Delhi, India
--	--

- Cleaned and transformed institutional data using Python and SQL.
- Built dashboards in Power BI for performance tracking.
- Automated KPI reporting processes for strategic decision-making.

PROJECTS

Healthcare Insurance Premium Prediction (Python, ML, Streamlit) [Github](#)

Built a machine learning model to predict healthcare insurance premiums using demographic, lifestyle, and health data. Applied Random Forest, Gradient Boosting Machines (GBM), XGBoost, and Neural Networks. Conducted EDA on 100k+ anonymized records analyzing factors like age, BMI, and smoking status. Developed a Streamlit web app for real-time predictions and visualization of key metrics.

Data Warehouse / Analytics (SQL Server) [Github](#)

Built SQL Server ETL pipelines for ERP/CRM CSV data. Modeled star schema and performed advanced SQL queries to support executive dashboards and insights.

Wisdom Pets Digital Transformation (BigQuery) [Github](#)

Migrated and modeled data in BigQuery. Executed analytical SQL queries, built Looker Studio dashboards, and created business reports to support decision-making.

Sales Performance Reporting (SQL, Tableau, Excel) [Github](#)

Built SQL Server ETL pipelines and star schema for ERP/CRM data. Delivered Tableau dashboards with sales insights and profitability recommendations.

EDUCATION

Bachelor in Computer Application, Guru Gobind Singh Indraprastha University 2022—2025
